PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience building production web and mobile systems for fintech, gaming, HR, and enterprise clients. Specialized in PHP (CodeIgniter, Laravel), Node.js/Express with TypeScript, React, Vue.js, MySQL, and MongoDB. Integrated 15+ third-party APIs, including payment gateways (GCash, Maya, DragonPay, HitPay, Stripe, PayMongo, QRPH, UnionBank i2i) and casino game providers (Evolution, JILI, Pragmatic Play, SA Gaming, PG Soft). Experienced with real-time WebSocket and Socket.IO systems, payroll compliance (SSS, PhilHealth, Pag-IBIG, BIR), and CI/CD pipelines.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Dart, SQL, HTML5, CSS3
Backend: Node.js, Express.js, Laravel, CodeIgniter, REST APIs, SOAP APIs, Microservices, WebSockets (Ratchet), Socket.IO, Redis / BullMQ
Frontend & Mobile: React, Vue.js, React Native, Flutter, Vite, jQuery, AJAX, Bootstrap, Tailwind CSS, Responsive UI
Databases: MySQL, MariaDB, MongoDB, Redis
DevOps & Cloud: AWS (EC2, S3), Docker, Linux, Nginx, Apache, PM2, Git, GitHub Actions (CI/CD)
Integrations: Payment gateways (GCash, Maya, DragonPay, HitPay, Stripe, PayMongo, SwiftPay, QRPH), UnionBank i2i Open Finance, LiveKit, DeepAR, Omada API, MultiChain (DLT), n8n, GoHighLevel
Testing & Tools: Vitest, Postman, Jira, Figma, Draw.io, Slack, VS Code, Cursor, Claude AI

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Hexacode Tech | Aug 2026 – Oct 2026

- Integrated SwiftPay as a payment vendor for PlayVault, a multi-brand gaming platform running 7 live casino brands, 13 in-house games, and an operator portal (Node.js, TypeScript, React, Socket.IO, MongoDB).
- Built merchant balance sync from the payment middleware, player reconciliation, and wallet sync fixes between PayCoinect and PlayVault.
- Built the PayCoinect Business payroll module from scratch: SSS, PhilHealth, Pag-IBIG, and withholding tax, payslip APIs, regional wage orders, and BIR Form 2316 export.
- Moved PayCoinect wallet sync to a single source of truth, replacing webhooks with a direct API; added send-money to business accounts and super-admin business account screens.
- Shipped fixes for a payment middleware that routes cash-in, cash-out, and QR traffic across 12+ providers, through a CI pipeline with lint, typecheck, and test coverage gates.

Full-Stack Developer – Supervisor

Surge Mobile Access Inc., Pasig City | Oct 2025 – Present

- Developed ZigZag Live, a React Native live streaming app (MERN, LiveKit, DeepAR) published on the App Store and Google Play, with real-time Socket.IO gifting, live battles, and in-app coin purchases.
- Built a MERN stack wallet and payment gateway integrated with QRPH and cryptocurrency wallet providers.
- Designed a WiFi captive portal that sells and activates internet vouchers, using a payment gateway and the Omada API for automated user authentication and network access control.
- Applied MultiChain to implement Distributed Ledger Technology (DLT) in the wallet project.

Full-Stack Software Developer / Programmer Analyst III

Vértere Global Solutions, Inc., Makati City | Feb 2025 – Sep 2025

- Delivered 50% of MVP features for a self-service loan application portal (Vue.js, Tailwind CSS, CodeIgniter API).
- Built a Banker's Rule (360-day interest) API microservice adopted across 4 channels, working with leads and analysts.
- Automated generation of promissory notes, disclosure statements, and amortization schedules, removing manual processing for thousands of documents.

Full-Stack Developer

Freelance, Remote | Sep 2024 – Jan 2025

- Built a casino platform covering admin and player operations with seamless wallet integration for Evolution, JILI, SA Gaming, and PG Soft.
- Implemented secure deposit and withdrawal processing and integrated DragonPay, FuturePay, and Sunny Page payment APIs.

Full-Stack Developer

MDS Call Solutions Inc., Makati City | Aug 2023 – Aug 2024

- Delivered 100% of MVP features for a self-service Early Wage Access application (Vue.js, Tailwind CSS, Laravel API).
- Developed and maintained secure, high-performance REST APIs for cross-system communication.
- Integrated UnionBank's i2i Open Finance platform for compliant multi-institution fund transfers.

Full-Stack Developer

Lucky8star Quest Inc., Mandaluyong City | Oct 2020 – Jul 2023

- Built an HRIS covering payroll, timekeeping, overtime, leave, and an employee self-service portal (PHP, CodeIgniter, MySQL), and optimized payroll queries for multi-department runs.
- Built a smart parking and cashier system with a WebSocket (Ratchet) live dashboard, automated fee calculation, and gate controller integration.
- Designed database structures and configured WebSockets for real-time updates across multiple production systems.
- Worked with designers on user flows and improved application performance and stability.

SELECTED PROJECTS

- **PlayVault – Multi-Brand Gaming Platform** (Node.js, TypeScript, React, Socket.IO, MongoDB, BullMQ): Operator portal, shared API, 13 in-house games, and 7 live casino brands with wallet sync and SwiftPay payouts.
- **PayCoinect & PayCoinect Business – Digital Wallet, Payroll & POS** (Node.js, Express, MongoDB, React, Flutter): Consumer wallet (web, iOS, Android) and merchant back-office with PH-compliant payroll and restaurant flows.
- **OtchoPlay – Multi-Provider Casino Platform** (PHP, CodeIgniter, MySQL, WebSocket): Integrated 8+ game providers (Pragmatic Play, EVO, JILI, SA Gaming) through REST and SOAP APIs.
- **BetWinU – International Casino Platform** (PHP, CodeIgniter, MySQL, Payment APIs): Multi-currency deposits and withdrawals with GCash, Maya, and banking APIs across PH, TH, VN, and MY.
- **ELOTTO – Online Lottery Platform** (CodeIgniter, MySQL, WebSocket (Ratchet)): Real-time live draws and GCash, Maya, and DragonPay payments with transaction audit trails.
- **OCBS / CRM – Kiosk Operations Platform** (PHP, CodeIgniter, MySQL): Multi-department CRM for kiosk lifecycle and inventory across 100+ sites.
